
SOURCE OBSERVATIONS REMAIN INTACT
01 Source records
Purchasing / inventory
Finance / commerce
Purchase-case events
02 Typed source KG
Typed nodes and edges
Source table and row
Batch and mapper version
03 Permitted evidence
Attributes and histories
No original master keys
No truth / canonical IDs
04 Scoring + decisions
Gated calibrated scores
Frozen policy thresholds
Type + one-to-one checks
05 Canonical view
Source-to-canonical links
Query answers and lineage
All source records retained
E1 Source preservation
Independent native SQL references
Counts / relations / provenance
E2 Equivalent contextual evidence
Independent SQL extraction
Identical features and scores
E3 Identity and query controls
SQL / graph under shared maps
Unreconciled / predicted / oracle
Evaluator-only truth: splits, labels, source references, query oracles
Truth never enters matching. Identity links follow scoring.
E4 Frozen-candidate evidence stress
E5 Projected workload growth
